Frontend Developer | React.js | Redux | Tailwind CSS

Job-ready Frontend Developer with experience in building responsive, scalable React.js applications. Skilled in REST API integration, state management (Redux/Context API), component-based architecture, and performance optimization. Adept at collaborating in Agile teams to deliver high-quality web experiences.

Skills

- **Languages & Tools:** JavaScript (ES6+), HTML5, CSS3, Git, GitHub
- **Frameworks & Libraries:** React.js, Redux, Redux Toolkit, React Router, Tailwind CSS
- **Concepts:** REST APIs, State Management, Context API, Routing, Debouncing, Authentication
- **Platforms:** Firebase (Auth, Hosting), Vercel
- **Others:** Responsive Design, Cross-Browser Compatibility, DSA (Java)

Projects

Movie-GPT App —[Live] (https://movie-gpt-94687.web.app)
Tech: React.js, Redux Toolkit, Firebase, Tailwind CSS, TMDB API, Google AI

- Developed an AI-powered movie recommendation app with dynamic search results.

- Integrated Firebase for user authentication and secure routing.

- Managed global state with Redux Toolkit for smoother UX and optimized performance.

YouTube Clone —[Live] (https://roaring-twilight-7ffa8d.netlify.app)
Tech: React.js, Redux, Tailwind CSS, YouTube API

- Cloned YouTube UI with search, video listing, and playback functionality.

- Implemented debounced search suggestions with real-time API integration.

- Added AI-generated comments feature for enhanced user interaction.

Swiggy App Clone
Tech: React.js, Redux Toolkit, Tailwind CSS, Swiggy API

- Built a food delivery clone app featuring restaurant listing and cart functionality.

- Used Context API for state management and gracefully handled real API limitations.

- Applied responsive design principles for smooth mobile experience.

Education

B.Tech, Electronics & Communication Engineering
Rajasthan Technical University, Kota

Certifications

Namaste React (Core + Advanced) – Akshay Saini
